

CONTINGENT PLANNING

To mitigate the flood like situation and after removal of flood water Malda KVK conducted demonstration on black gram and covered 30.0 hectare of land under this crop. For quick return, Malda KVK recommended cultivation of vegetable in general and leafy vegetable in particular. Leafy vegetable like Methi, Coriander, red amaranthus etc. were recommended and covered 3.0 hectare of land.

Moreover, as per work plan the farmers of the flood affected area were supported by various fruit plants like banana (both green and ripe), lime, lemon, guava etc.

Demonstration of Blackgram : cv. PU-30	Demonstration of Blackgram; cv. WBU-108
	
Demonstration of Coriander with other leafy Vegetables	Cultivation of vegetables in scaffold
